Subject: Microsoft Settlement

Pursuant to the Tunney Act, I hereby submit my comments on the proposed settlement of *United States v. Microsoft Corp.*, Civil No. 98-1232.

In order to provide an effective remedy to the Court of Appeals decision, Microsoft should be required, *inter alia*:

(1) to make the most current version of Windows available on an open source basis, compensating Microsoft for the fair market value of the intellectual property;

(2) to make the most current version of Internet Explorer available on an open source basis, compensating Microsoft for the fair market value of the intellectual property;

(3) to port the latest version of the application Microsoft Office to work on the Linux operating system.

Thank you.

James J. Decoulos, PE, LSP
